

## **Sprints and Hills Committee Report**

Due to illness this is a late report so a quick summary

Two items passed by council.

Additive required by methanol users to show a flame when methanol is burning

New regulations governing cars that do not have the ability to self start, and the risk assessment required by the event organisers

The council did not pass the request to allow 14 year olds.

A detailed handbook on the risk assessments required in 2018 will be released shortly. Basically what we already do but detailing how to document these areas so in the event of a problem we are able to prove the risks were assessed.

A review of Section S is underway.

The rules and training needs for electric / hybrid cars in events are being clarified as each vehicle has different needs.

AFP

Argyll Festival of Performance press day on the 26th October will announce the support from several serious and major sponsors / organisations / drivers / owners making this the major Scottish event of 2018. AFP date is 2/3 June 2018

Best wishes
